EXPERIENCE

Beijing Rising Education

08 / 2015 - Present

Front-end Web Developer

Constructing and maintaining a website for "Rising Education", based on the open-source Wordpress framework.

Carleton College

09 / 2014 - Present

Techonlogy Support Assistant

As a branch of ITS, the helpdesk employs over 50 CarlTechs who provide front-line technical support for all staff, faculty, and students currently enrolled at Carleton, including those off-campus; in academic, administrative, and residential capacities.

CarlTech duties involve working shifts at one of our two service desks on campus, each open over 100 hours per week: the helpdesk itself in the CMC and the Research/IT desk in the library. Your primary duties involve providing user support and maintaining public labs and printers.

CarlTechs provide support by answering walk-up questions, manning the helpdesk phone lines, and going into the field to handle issues we were unable to resolve over the phone. CarlTechs are expected to help all clients resolve issues relating to their Carleton accounts, network access, printing and printers, the use of lab and desktop computers located in offices and classrooms, and with most software made available to the Carleton community.

Additional services are available to students, as we are effectively their ISP (Internet Service Provider). This includes configuring personal devices such as laptops and gaming consoles on the network and providing a limited repair service for personally owned computers with software problems or minor hardware issues.

CarlTechs also help support, maintain, and supply 13 public lab spaces across campus which hold approximately 250 computers (both Mac and Windows platforms) and 14 printers.

Veritas China

07 / 2015 - 08 / 2015

Lecturer

Giving an introductory course to Computer Science & Audio Signal Processing.

Barnes & Nobles Carleton Bookstore

11 / 2014 - 01 / 2015
